In both following patient cases a wearing time of 15 hours per day was requested from the dentist. The blue bar represents this advise with a 10% tolerance towards less wearing time. The guideline for requested wearing time can be adjusted for each patient and each wearing period individually by the doctor to adapt to different treatments.

Excellent Compliance:

Besides two outliers the brace was worn even much more than the patient was instructed.

Poor Compliance:

Insufficient wearing time during the entire period, but increased wearing time shortly before the next inspection can be seen !
